

QGIS Application - Feature request #5319

Performance issues with new symbology and levels

2012-04-05 04:29 AM - cremat0rio -

| Assignee:  |           |                              |
| Category:  | Symbology |                              |
| Pull Request or Patch supplied:  |           | Resolution: duplicate        |
| Easy fix?:   | No        | Copied to github as #: 15022 |
| Description  |           |                              |
| I'm using QGis 1.7.3 (the same happens on 1.7.1).  |           |                              |
| With a polygon layer, and the new symbology with levels, QGis gets very slow and only uses one thread (it seems so), wich is strange nowadays with multicore processors. |           |                              |

duplicate of #3388

#2 - 2012-04-05 04:35 AM - Giovanni Manghi

- Resolution deleted (duplicate)
- Status changed from Closed to Feedback

sorry I didn't see that #3388 was already closed. Anyway you will need to provide sample data and further information to allow investigate if/where there is an issue.

#3 - 2012-04-09 09:37 AM - cremat0rio -

Sorry, there's no issue.

Horizontal placement, in "Layer labeling settings", was inadvertently selected.

Sorry.

Sorry.

so the issue is in labelling?

**#5 - 2012-04-09 10:09 AM - cremat0rio -**

Going to Labeling -> Advanced -> Placement, there are various options.

"Horizontal" specifically states "slow".

So this is not a bug, maybe a feature request.

work is being done to make labelling faster, especially with polygons.
