Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	worksforme	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15025	

Description

Just installed/updated qgis-master on two Ubuntu 11.10 machines.

When adding a WMS layer it doesn't show anymore how many bytes is downloading, it just shows a few numbers, not sure what it is.

It seems very slow to add/render WMS layers (if compared with the same servers/layers that worked fine in previous versions of qgis-master).

In saved projects it doesn't render anymore WMS layers. Also adding new layers to a already existing project doesn't seems to work.

History

#1 - 2012-04-05 09:57 AM - Giovanni Manghi

I confirm this "erratic" behaviour also on Windows/osgeo4w.

#2 - 2012-04-05 11:38 AM - Giovanni Manghi

I tested packages of self compiled qgis-master from 3/4 days ago and it works as expected.

#3 - 2012-04-08 11:20 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

Just installed from the nightly build repo and also recompiled and the issue is gone...

#4 - 2012-04-09 03:15 AM - Giovanni Manghi

- Resolution deleted (worksforme)

- Status changed from Closed to Feedback

It still doesn't work on Windows/master/osgeo4w, but I'm not sure if the Windows build is up to date as the Ubuntu/nightly build one, so I guess it is needed to wait a little and test again.

#5 - 2012-04-11 04:57 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Feedback to Closed

works fine also on Windows now
