Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	15049	

Description

I'm using QuantumGIS 1.9.0 Master under Ubuntu 12.04, after several updates I realized that I no longer can find Project Properties menu. The place where it used to be is empty between 2 separators. I attached a screenshot. Did I make a mistake during updates or some misconfiguration.
Thank You, QGIS Rocks!

- Resolution set to duplicate

- Status changed from Open to Closed

Duplicate of #4434.

It is a bug when using the unity desktop manager. As worksround, to access project properties click on the "crs status" icon in the lower right corner of the qgis main window.
