Category: Symbology	
Pull Request or Patch supplied:	Resolution: wontfix
Easy fix?: No	Copied to github as #: 15063
Description	
<p>Hi,</p> <p>Probably as a consequence of a bug fix, it is not possible anymore to represent DXF closed polylines as polygons. This capability was very useful.</p> <p>I suggest that open polylines should be represented as polylines in QGIS, and closed polylines as polygons.</p> <p>Best regards</p>

Doing some tests, I found that the DXF feature 'Hatch' can be displayed as Polygon feature in QGIS. I agree that this way is more correct than the other - display closed polyline as polygon, so I think that the ticket should be closed.

#2 - 2012-05-07 06:41 AM - Giovanni Manghi

- Resolution set to wontfix

- Status changed from Open to Closed
