

QGIS Application - Bug report #5403

MS SQL Server - create new point feature not committing change to table

2012-04-18 01:04 AM - Carlos da Ponte

Status:	Closed	
Priority:	Normal	
Assignee:	Tamas Szekeres	
Category:	Data Provider/MSSQL	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 15071
Description		
<p>We've checked out a table for editing (user has full permissions server side to edit), created a new point or polygon feature which is visible, however once we try to save the change the new feature dissapears. Oddly enough, we can copy an existing feature on a checked out table, paste it, change it, and save the changes and they are committed to the table server side. Let me know if you need more details. Happy to provide access to test dataset</p>

It works for me, however. Would you provide your sample data?

- Status changed from Feedback to Open

#5 - 2012-08-18 03:03 AM - Tamas Szekeres

- Status changed from Open to Feedback

Does this problem still persist? I don't see the issue in the master branch.

#6 - 2012-09-04 12:08 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#7 - 2014-06-01 08:29 PM - Nathan Woodrow

- Status changed from Feedback to Closed

Closing due to lack of feedback. Reopen if you see the problem in latest nightly build.
