

QGIS Plugin Site - Bug report #5408

plugin registration confusing - no "New project" link

2012-04-18 12:31 PM - Etienne Tourigny

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Pull Request or Patch supplied:	
Description	
<p>The instructions for adding a new plugin (at http://plugins.qgis.org/) say to register a new plugin at https://issues.qgis.org/projects/qgis-user-plugins , however this page does not include a "New project" link.</p> <p>The work-around is to go to the root project page (https://issues.qgis.org/projects) and create a new top-level project, which someone will move under "User Plugins" project.</p> <p>This is confusing because</p> <ol style="list-style-type: none">1) No "New project" link on the page where it is expected2) Author can hesitate to create a new top-level project (as happened to me) <p>Solution would be to update the link and docs, or simply add a "New project" link in the "User Plugins" project.</p>

user etourigny has now edit rights, you can log into <http://plugins.qgis.org/admin/> and fix this in the plugins.qgis.org website.

Thanks

however, I am not sure what to write there. For my own project (Loop Visible Layers), I can create a subproject (because I am manager) and I can also set it as a subproject of "User Plugins" (but I'm not sure this option was available when I created it initially or appeared after someone made my project a subproject or "User Plugins").

Would it be possible to allow anyone to create a sub-project of "User Plugins"? That would be the simplest way to fix this.

#3 - 2012-04-18 11:17 PM - Alessandro Pasotti

This is a bug in redmine, which is a different application from plugins.qgis.org.

Please move the bug there (sorry I can't find the tracker for qgis redmine now).

IIRC this bug has been filed several times in the last year, no solution so far.

What I suggest you is to improve the documentation in the home page of the website here:

this is the entrypoint for editing the (home) page

<http://plugins.qgis.org/admin/flatpages/flatpage/1/>

but you can also add new pages and link from there or add menu items.

#4 - 2012-04-19 05:05 AM - Etienne Tourigny

I have updated the documentation and created bug #5414 for redmine. This bug can be closed (I can't do it).
