

QGIS Application - Bug report #547

QGIS 0.8.0 Crashes when loading 119 layers approx 288kb in size.

2007-01-23 02:16 AM - Redmine Admin

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Project Loading/Saving	
Affected QGIS version:	Regression?: No
Operating System: OS X	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10606
Description	
<p>The new version of QGIS will not load files created with 0.7.4 consistently - 119 layers approx 288kb in size. When a file loads, QGIS unexpectedly exits and does not create any crashreporter log entries.</p>

Im moving this over to 0.8.2. Can the original poster please confirm if this issue still exists after 0.8.1 is releasd.

Thanks

Tim

#2 - 2008-02-12 07:27 AM - Paolo Cavallini

given the many changes between 0.8 and 0.9, it seems unlikely that the bug survived. Could anybody confirm that it is still alive? Otherwise, better closing it.

#3 - 2008-07-08 10:41 PM - Paolo Cavallini

- *Resolution set to fixed*

- *Status changed from Open to Closed*

Lacking additional feedback, better closing it.
