

QGIS Application - Feature request #5470

Manage different versions of OTB

2012-04-23 09:08 AM - Julien Malik

Status: Closed	
Priority: Normal	
Assignee: Victor Olaya	
Category: Processing/Core	
Pull Request or Patch supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 15096
Description	
<p>As of today, OTB algorithm descriptions are embedded in Sextante, and not dynamically generated from OTB.</p> <p>It is generated on top of a trunk version of OTB.</p> <p>Typically some algo won't work within OSGeo4W, because it ships with the latest release.</p> <p>One simple idea discussed at the HF was to have several "description" folders into the sextante/otb dir, one for each supported OTB version.</p>

Some providers are being removed from QGIS/Processing (will be available as plugin) and so are their categories in the bug tracker. To not leave them orphaned of a category they are being reassigned to processing/core.
