

QGIS Application - Bug report #5497

add geometry column error

2012-04-25 02:46 PM - Piotr Pachol

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:			
Affected QGIS version:	master	Regression?:	No
Operating System:	Windows 32bit	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #:	15110
Description			
Problem with adding geometry column to some kind of shapefiles (attached zipped shp file with 3 points). After executing the function 'export/add geometry column' all xcoord and ycoord values equals zero.

Is the attached sample a 3d vector?

#2 - 2012-04-26 01:37 AM - Salvatore Larosa

Hi Giovanni,
it is only a MultiPoint geometry vector!

so is this duplicated of #5293 ?

#4 - 2012-04-26 09:15 AM - Salvatore Larosa

I'd say it is, the origin of problem is the same,
but here the sample data could may be usefull to testcase!
In #5293 we have:
3D MultiPoint geometry: not working
3D Point geometry: working
and here:

MultiPoint geometry: not working

In #5293 we have:
3D MultiPoint geometry: not working
3D Point geometry: working
and here:
MultiPoint geometry: not working

can you make a test with a multi-polygon? I feel that this can be an issue of just multi-points layers.

duplicate of #5293

I need of a sample data for that!

I feel that this can be an issue of just multi-points layers.

surely you're right as well as subject of #5293 says,
but I'd want test it even with MultiPolygon and MultiLinestring.

Anyone can sharing some data for tests?
