

QGIS Application - Feature request #5532

Saved styles enhancement

2012-05-02 05:29 AM - Olivier redlead

Status:	Closed	
Priority:	Normal	
Assignee:	Nathan Woodrow	
Category:	Symbology	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 15127
Description		
<p>The saved styles feature is great, but not very practical to use. It is</p> <p>Here are the problems :</p> <ul style="list-style-type: none">- As soon as there are more than 5 or 6 styles, the styles browser is full and you need to scroll up or down to find what you want.- The scroll wheel scrolls too quickly and you have to go several times back and forth until you can find the style you want.- The "Symbol selector" window opens up at the same default size every time, which forces to resize the window to see more styles at once.- The window resize spoils a lot of space in resizing the whole window instead of only the "Saved styles" field- The names of the styles are not displayed, which makes it difficult to choose the right style between to similar styles <p>Here is how I would love it to work :</p> <ul style="list-style-type: none">- Have different display modes for style : big icons (with and without name), small icons (with and without name), list- Be able to quick-search a style by it's name- Be able to group and or tag the styles <p>(please excuse me if I made some mistakes in the feature request since it is my first one)</p>		

History

#1 - 2012-05-04 04:00 AM - Nathan Woodrow

- Assignee set to Nathan Woodrow

All the symbol dialogs are getting a make over in this year GSoC. Will take your feedback on board for the student working on that project.

#2 - 2012-09-04 12:09 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#3 - 2013-01-12 02:00 AM - Nathan Woodrow

- Status changed from Open to Closed

Please check the latest build most of these issues should now be fixed.
