

QGIS Application - Bug report #556

Field should be Layer in GRASS lingo

2007-01-30 01:47 AM - Redmine Admin

Status:	Closed	
Priority:	Low	
Assignee:	Aaron Racicot -	
Category:	GRASS	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10615
Description		
0.8 SVN 6453		
Please update all the occurrences of "Field" term in relation to GRASS vectors to "Layer". These are two same things, but Field has been replaced by Layer many months ago in GRASS.		
Things to update are, AFAIK:		
1. GRASS Edit's attribute editor still mentions "Field"		
2. GRASS Edit's "Table" tab mentions "Field (layer)"		
Maciek		

History

#1 - 2007-02-09 09:44 AM - Redmine Admin

It is a defect.

#2 - 2007-11-15 02:27 PM - Aaron Racicot -

- Status changed from Open to In Progress

#3 - 2007-11-16 02:33 PM - Aaron Racicot -

Added a patch to src/plugins/grass/qgsgrasseditbase.ui to change the two occurrences of "Field" to "Layer".

#4 - 2007-11-16 02:48 PM - Martin Dobias

- Resolution set to fixed

- Status changed from In Progress to Closed

Patch applied in commit:a5dfe886 (SVN r7429).

Thanks for the contribution!
