Status: Closed	
Priority: Normal	
Assignee: Alexander Bruy	
Category: Project Loading/Saving	
Pull Request or Patch Supplied: Yes	Resolution: fixed
Easy fix?: No	Copied to github as #: 15146
Description	
<p>This patch adds a new feature in Qgis Desktop project properties. The aim is to provide a way to configure and use a scale list for each project:</p> <ul style="list-style-type: none">- display and manage a list of user defined scales per project in the project properties dialog- replace the content of the status bar scale combobox if project scales are defined when opening an existing project- default scale list is used whenever no project scale list has been found <p>The patch can be found here https://gist.github.com/2627175</p> <p>PS: This is my first patch for Qgis, so feel free to comment/modify/annotate. PS2: I assigned this patch to Alexander Bruy, author of the QScaleCombobox class.</p>

Good job. Looks good to me. Might have to wait until 1.8 is out though as it's a new feature, not really a bug fix.

#2 - 2012-05-10 12:22 AM - Alexander Bruy

- Target version changed from Version 1.8.0 to Version 2.0.0

Thanks for patch, I'll look at it ASAP. But as this new feature it can be applied only after releasing 1.8.0

#3 - 2012-05-10 12:27 AM - Michael Douchin

- Pull Request or Patch supplied changed from No to Yes

Thanks for reviewing this patch. Good point for postpone it to Qgis after 1.8.

Please have a look to my use of the method "showScale" and "mMapCanvas->updateScale()". I did not know very well Qgis core, so it may be a bit hacky...
