

QGIS Application - Bug report #5571

Debian testing build fails after Qt update.

2012-05-11 01:34 AM - Andy Wood

Status: Closed	
Priority: Normal	
Assignee:	
Category: Build/Install	
Affected QGIS version: master	Regression?: No
Operating System: Linux	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: upstream
Crashes QGIS or corrupts data: No	Copied to github as #: 15152

Description

After the Qt library update in Debian testing (wheezy) last night, qgis will now not build:

```
-- Found Qt4: /usr/bin/qmake (found suitable version "4.8.1", required is "4.4.0")
CMake Error at CMakeLists.txt:227 (MESSAGE):
  Qt Webkit module required for QGIS Desktop!
```

History

- Resolution set to upstream
- Priority changed from High to Normal

To my knowledge this is a problem in the libqtwebkit debian package and should be reported to the creator of the debian package ..

#2 - 2012-05-11 11:08 AM - Jürgen Fischer

- Status changed from Open to Closed

Apparently a problem in libqtwebkit-dev that is already fixed in unstable. cmake looks for libQtWebKit.so in /usr/lib/x86_64-linux-gnu although it's in /usr/lib
