

QGIS Application - Bug report #5588

Print Composer - arrow size

2012-05-14 08:58 AM - Jonathan Moules

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 2.0.1	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 15165
Description	
<p>I create a new composer, then click on the "Add arrow" button and then click on the blank space. This gives me a piddly little arrow. So I mouse over one of the corner boxes and drag and see a nice satisfying bounding box which implies my arrow is about to get bigger. I release the mouse button and... the arrow moves to the new location but doesn't get any bigger.</p>	

History

"Attribute table" does this too. Other elements may also.

The reason this is a problem is because if I wanted to "move" it, I'd use the "move" hand.

- Assignee set to Marco Hugentobler

I confirm it on master/ubuntu. If the user mistakenly just click instead of dragging a little the mouse, then it remains with an object that seems not resizable.

Jonathan Moules, on what version of qgis are you getting the issue? 1.7.4?

#3 - 2012-05-15 02:14 AM - Jonathan Moules

Yep, 1.7.4

#4 - 2012-05-15 02:34 AM - Giovanni Manghi

#5 - 2012-06-16 02:35 AM - Jürgen Fischer

- Status changed from Feedback to Open

#6 - 2012-09-04 12:09 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#7 - 2013-09-22 03:07 AM - Giovanni Manghi

- Affected QGIS version changed from 1.7.4 to 2.0.1

- Assignee deleted (Marco Hugentobler)

- Target version changed from Version 2.0.0 to 70

#8 - 2013-09-26 11:30 AM - Jürgen Fischer

- Target version changed from 70 to Future Release - High Priority

#9 - 2014-04-06 06:04 AM - Jürgen Fischer

- Category changed from 33 to Map Composer/Printing

#10 - 2014-06-03 03:48 AM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

This isn't reproducible in master anymore.
