<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> wontfix
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 15177
<b>Description</b>	
Sometimes in categorised and graduated symbology the number of classes is HUGE and if a user needs to change a property of all the classes at the same time, then selecting all them can be annoying. A "select all classes" button would be very useful.	

### History

#### #1 - 2012-10-06 02:19 AM - Pirmin Kalberer

- Target version changed from Version 2.0.0 to Future Release - Nice to have

#### #2 - 2012-11-14 05:24 AM - Leyan Ouyang

It is already possible to select everything by using Ctrl-A, a pretty standard shortcut. I think a button for this purpose would be too much, maybe add this in the right click menu if the shortcut is not enough ?

#### #3 - 2012-11-14 05:27 AM - Giovanni Manghi

right click would be fine (common users are not used to use shortcuts), but in any case it would be necessary to document this feature, if not already.

#### #4 - 2014-06-20 09:45 AM - Giovanni Manghi

- Resolution set to wontfix

- Status changed from Open to Closed

ctrl-a is good enough.
