

## QGIS Application - Bug report #5616

### "Add" button is enabled when no PostGIS layers are selected

2012-05-18 12:24 AM - Mike Taves

<b>Status:</b> Closed	
<b>Priority:</b> Low

<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 15187
<b>Description</b>	
<p>In the "Add PostGIS Table(s)" dialog, when no layers are selected, the "Add" button is enabled. Clicking this button shows an information dialog:</p> <p><i>You must select a table in order to add a layer.</i></p> <p>Although this is all logical at a basic level, it could be confusing to the user. Particularly if they had already selected a layer, then double-clicked it to build a query, and the layer became unselected. The "Add" button should only be enabled when there are greater than zero layers selected, otherwise it should be disabled.</p> <p>As a minor touch-up, the dialog does not list PostGIS "tables", rather they are layers (as the pop-up text shows for the icon). These can be any number of combinations of tables and/or views with one or more geometry/geography columns .. or simply put, layers.</p>
