

QGIS Application - Bug report #562  
small bug in WMS getFeatureInfo handling

2007-01-31 12:12 PM - Redmine Admin

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Web Services clients/WMS	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 10621
<b>Description</b>  getFeatureInfo requests only work correctly if the map window is full, i.e. there is no additional white space above, or to the left of the image. getFeatureInfo requires an X,Y coordinate from the top left of the map but when there is white space, maybe because the returned image is too small (a lat-lon map of the world for instance), qgis still takes the pixel from the top-left of the map window and not the top left of the returned map image.		

History

#1 - 2007-06-08 12:26 AM - Marco Hugentobler

- Resolution set to fixed
- Status changed from Open to Closed

This is fixed now in head and 0.8.1

#2 - 2009-08-22 12:51 AM - Anonymous

Milestone Version 0.8.1 deleted
