| Easy fix?:  | No      |   |
| Description   |         |   |
| <p>Add the ability to control the rendering order of Labels and Diagrams. Perhaps with the addition list entries named: "layername [Labels]" and "layername [Diagrams]" or an icon beside the layername. This would also be a handy way to quickly toggle Label/Diagram visibility.</p> <p>Of course, this would open a can of worms regarding order behaviour. Do new labels go above source layer by default, or the top of stack? Can the old behaviour be toggled on/off "Always keep labels at top"? etc, etc.</p> |         |   |

History

#1 - 2012-09-04 12:09 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#2 - 2012-10-06 02:19 AM - Pirmin Kalberer

- Target version changed from Version 2.0.0 to Future Release - Nice to have

#3 - 2015-02-10 02:43 AM - Christophe Damour

I would like to second this request, as I find it very important to be able to tune label and diagram display independantly.

Right now I can only chose to have all diagrams AND labels displayed, or only non overlapping ones, which results often in having either the diagram or the label.
