QGIS Application - Bug report #5641
Empty query does not get processed in query builder

2012-05-25 10:09 PM - Leyan Ouyang

Status:	Closed		
Priority:	Low		
Assignee:			
Category:			
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	Yes	**Resolution:**	fixed
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15204

Description

If the query text box is empty when clicking the OK button, the empty string is not used and evaluated. This means that if there was already a query existing, it is kept, instead of the expected result of clearing it. Validating an empty query should be equivalent to clearing the query.

This is due to a test made in QgsQueryBuilder::accept(), skipping the validation for an empty query. I do not see the point of this test, so I propose simply to remove it. If it is useful to avoid validation of an empty query for another reason, we should still validate it with mLayer->setSubsetString("");

Patch attached.

History

#1 - 2012-06-16 02:29 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:ed70b941e85bec981036882aad33a1cb38ed8045
