| In the dropdowns of the gdal tools the layers are not ordered alphabetically, when they are a lot (large projects) it is not easy to find the right input. |                   |                                     |

- Resolution set to invalid

- Status changed from Open to Closed

Layers are sorted in legend order.
