Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15263

Description

This bug was present in QGis 1.7.1, a similar problem resulted in segfaults in 1.7.2.

Here's the steps to reproduce it:

0. starting from EPSG:4326,

1. open the dialog to select the project CRS,

2. enable the OTFR and set different a crs (e.g. EPSG:3003),

3. switch to the General tab,

4. then switch again to the CRS tab,

the previous CRS (EPSG:4326) is selected again.
