QGIS Application - Bug report #577
Error reading ArcGIS Binary Float Grid files (FLT)

2007-02-07 05:16 AM - richardlangford-aapt-net-au -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Rasters		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	10636

Description

Quantum 0.8.0 (Titan) crashes when I try to load a FLT file created in [[LandSerf]] or Oasis Montaj Viewer. The previous version 0.7 loaded the same files with no error.

History

#1 - 2008-05-30 09:51 AM - ersts -

- Resolution set to worksforme

- Status changed from Open to Closed

QGIS no longer crashes but the flt's are not properly displayed. This is actually a GDAL limitation and a bug report should be submitted there as well.

#2 - 2009-08-22 12:54 AM - Anonymous

Milestone Version 0.9.2 deleted
