Pull Request or Patch supplied:	No	**Resolution:**	worksforme
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	15277

Description

Since I installed QGIS 1.8, when I use the "Layer properties", choosing "Graduated", a box tells me that the color ramp is not present anymore (I'd need to see the problem again to make a detailed-reporting).

I found the solution but I need to do it everytime I boot my computer. I have to import "colorbrewer_symbols.xml" into Style Manager and the color ramp is available.
