

QGIS Application - Bug report #5829

WMS reprojection broken in QGIS master

2012-06-20 03:48 AM - Giovanni Manghi

Status: Closed	
Priority: Severe/Regression	
Assignee: Marco Hugentobler	
Category: Web Services clients/WMS	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 15304
Description	
I'm testing one beside the other QGIS 1.8 and Master, and it seems that in master the WMS reprojection is broken.	
Seems a consequence of the raster resampling merge.

Works for me with master. If the problem persists, could you post a sample service and which CRS to use?

- File 34.png added
- File wms_18.qgs added
- File wms_master.qgs added
- File 37.png added

I just updated qgis-master and I can confirm the issue. Attached two projects one made with 1.8 and the other with master. The project made with master also show the other issue (WMS-C support is broken). Thanks in advance.
