

# QGIS Application - Bug report #5839

## WMS client in browser needs to handle WMS-C servers

2012-06-21 08:56 AM - Giovanni Manghi

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Browser	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 15311
<b>Description</b>	
<p>When connect to a WMS-C server (ex tilecache) the layer list is presented in the "tilesets" tab. The user must select the layer from that tab, because if he selects the layer from the "layers" tab then it will not show in the canvas.</p> <p>It seems that the browser (both from "wms" and "ows") picks the layer from a WMS-C server the wrong way, so it will not show in the canvas.</p> <p>Tested on master.</p>	

### History

#1 - 2014-06-12 04:01 PM - Giovanni Manghi

- Resolution set to fixed/implemented
- Status changed from Open to Closed

it works as expected now.
