

## QGIS Application - Bug report #5846

### Adding layers not placed in group or current position in legend

2012-06-21 03:02 PM - John Tull

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> Map Legend	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b> OSX	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 15316
<b>Description</b>	
Layers are added to the top of the map legend rather than above the currently selected layer or in an active/selected group. This was working up to the 1.8 release, so a regression from new changes in trunk.

Works here. Please check in "Settings-Options-General" if checkbox "Add new layers to selected or current group" is checked

You are correct. This is a fresh system install and I overlooked that as a preference. Ticket closed.
