

QGIS Application - Bug report #5848

Different icons for QGIS and QGIS Browser

2012-06-22 12:23 AM - Alexander Bruy

Status:	Closed		
Priority:	Normal		
Assignee:	Larry Shaffer		
Category:	Browser		
Affected QGIS version:	master	Regression?:	No
Operating System:	Windows	Easy fix?:	No
Pull Request or Patch supplied:	Yes	Resolution:	fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #:	15318
Description			
<p>Currently both QGIS and QGIS Browser share same icon, this is a bit confusing for users. It will be better to use different icon for QGIS Browser. Here is my attempt to create such icon.</p> <p>P.S. not sure how to classify this — as bug or as feature. Please correct, if I'm wrong</p>

History

#1 - 2012-09-04 12:06 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#2 - 2012-11-03 12:35 PM - Alexander Bruy

- File browser_ico_32.png added

Here is sample icon for QGIS Browser.

#3 - 2012-11-03 12:47 PM - Larry Shaffer

- File qqisb.png added

- Status changed from Open to Feedback

Hi Alexander,

Here is a version I made for when we created an alias to the embedded browser within the main QGIS.app bundle for Mac OS X (commit:3c1c229). Attached here as a PNG, exported from the Mac .icns file.

#4 - 2012-12-31 01:02 AM - Giovanni Manghi

- Assignee set to Larry Shaffer

Hi Larry,

could you please commit this icon? Especially on Windows having two identical icons on the desktop is very confusing for many users.

#5 - 2014-01-07 12:42 AM - Alexander Bruy

- Category set to 95

#6 - 2014-02-17 03:21 AM - Paolo Cavallini

- Pull Request or Patch supplied changed from No to Yes

- Tag set to easy

See:

<https://drive.google.com/folderview?id=0B98hU-Ebn7VvX2IGTFRvWkdiX28&usp=sharing>

IMHO this should changed, as it is quite confusing for users.

#7 - 2014-02-17 03:29 AM - Jürgen Fischer

and which one? two here, a couple of others there...

#8 - 2014-02-17 03:35 AM - Paolo Cavallini

My vote is for qgis_browser_icon_prototype_v6.svg

But anyone is ok for me.

#9 - 2014-02-17 05:12 AM - Andreas Neumann

- File qgis_browser_icon_prototype_v1.svg added

My vote is for the version qgis_browser_icon_prototype_v1.svg - but with a change that the folders are in blue instead of yellow (like in OSX or KDE). This way one can better distinguish the folders from the QGIS icon.

I uploaded a modified version at this ticket with the blue folders.

#10 - 2014-02-17 05:56 AM - João Gaspar

Andreas, my suggestion:

If we use the icon v1 prototype we need to pick a color for the folders that is neutral for all OS.

But for me the main goal is definitely the use of a different icon for browser.

#11 - 2014-02-17 09:39 AM - Anita Graser

I don't think v1 is the best option. In my opinion, the difference between the desktop and browser icon should be more easily visible. My suggestion would be v6 or v9.

Is this the correct location in the repo to put the new browser icon:

<https://github.com/qgis/QGIS/tree/master/images/icons><https://github.com/qgis/QGIS/tree/master/images/icons>?

#12 - 2014-02-17 02:41 PM - Larry Shaffer

I agree with Anita, the icon needs to be more discernible from desktop app icon, especially when at 24 x 24px. However, I think the folder graphic should be avoided, since it will *always* clash with some OS's folder icons.

I used a magnifying glass as an icon stamp (see above). I suggest using that or a similar concept for a stamp, or having a 'browser'-concept background, and one that is more 3D-looking than the current choices.

#13 - 2014-02-18 09:54 AM - João Gaspar

- *File icon_prototype_v14_magnifier.svg added*

Icon based on magnifier icon of Larry.

#14 - 2014-06-12 06:26 PM - zirneklitis -

- *File qgis_browser_icon_prototype_v12.svg added*

Keeping in mind the size of icons (16×16, 24×24, .. , 512×512) I modified the qgis_browser_icon_prototype_v2.svg

#15 - 2014-06-13 01:13 AM - zirneklitis -

- *File icons.tar.xz added*

The old QGIS symbol is good for creating QGIS browser icon as it is much thinner than the present one. Take a look at the set of icons.

#16 - 2014-06-28 07:42 AM - Jürgen Fischer

- *Target version changed from Version 2.0.0 to Future Release - Lower Priority*

#17 - 2014-10-02 01:50 PM - João Gaspar

- *File icon_prototype_v15_magnifier.png added*

Hi guys,

based on discussion in <http://osgeo-org.1560.x6.nabble.com/Qgis-files-and-related-icons-td5163236.html>:

new version of the prototype:

https://github.com/jonnyforestGIS/Prototype_QGIS_Browser/blob/master/icon_prototype_v15_magnifier.svg

See in attach a png. preview

Regards

João

#18 - 2014-10-04 06:17 AM - João Gaspar

Hi guys, i add more icons for .qml, .qgs, .qpt see in:

https://github.com/jonnyforestGIS/others_prototype_files_QGIS

The mailing discussion is over here:

<http://osgeo-org.1560.x6.nabble.com/Qgis-files-and-related-icons-td5163236.html>:

Regards,

João

- *Status changed from Feedback to Open*

#20 - 2015-05-22 12:02 PM - Anita Graser

- *File qgis_globe_draft1.svg added*

- *File qgis_globe_draft1.png added*

We discussed this shortly at the dev meeting. The browser icon should be significantly different to be easily distinguished from the desktop icon. Therefore, small addons in the corner of the original Q don't work.

I suggest the following icon which uses the QGIS colors but the color focus is clearly on the darker green rather than the yellow-green of the Q.

It would be great if we could decide to have a new icon in 2.10. Jürgen has already prepared the repo and we just need to replace

<https://github.com/qgis/QGIS/blob/master/src/browser/browser.ico>

qgis_globe_draft1.png

#21 - 2015-05-24 04:53 AM - Anita Graser

- *File qgis_browser.ico added*

Here's the ico

#22 - 2015-05-26 09:53 AM - Anita Graser

- *Resolution set to fixed/implemented*

- *Status changed from Open to Closed*

- Target version changed from Future Release - Lower Priority to Version 2.10

The icon is in now. Thanks Jürgen for adding!

#23 - 2015-05-26 01:07 PM - Jürgen Fischer

(accidently) committed in commit:83899182

#24 - 2015-05-27 05:17 PM - Larry Shaffer

Hi,

If this new icon is agreed upon, I will convert it for Mac icon format and place it at (qgisb.icons):

<https://github.com/qgis/QGIS/blob/master/images/icons/mac/browser/>

#25 - 2015-05-27 11:51 PM - Andreas Neumann

Would it be possible to also backport this to the 2.8 branch? Esp. for people who installed several versions at once, it helps a lot to better distinguish browser from desktop. Also, it should be fairly save to backport this ;-)
