

QGIS Application - Bug report #585

Map composer scalebar and legend setout errors

2007-02-11 06:38 PM - Jeremy Palmer

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:		
Affected QGIS version:		Regression?: No
Operating System: Windows		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 10644
Description		
<p>Currently in the 0.8 win32 build of QGIS the legend border box and layer name text overlap. The issue seems to go alleviate itself if you increase the font size.</p> <p>Also the scale bar in the composer is not disguisable. It looks like the height of the scale bar is too small.</p> <p>Refer to the attached screenshot for reference.</p>		

History

#1 - 2007-07-16 01:05 PM - Steven Bell -

- Resolution set to fixed
- Status changed from Open to Closed

These should be fixed as of .

#2 - 2009-08-22 12:52 AM - Anonymous

Milestone Version 0.8.2 deleted
