

# QGIS Application - Bug report #5918

## Included Python has security vulnerabilities

2012-06-30 11:48 AM - Kevin Gagel

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Build/Install	
<b>Affected QGIS version:</b> 1.8.0	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> upstream
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 15359

### Description

The version of Python included with version 1.8.0 of QGIS has a security alert associated with it making QGIS insecure and security software is alerting on it.

Python announcement: <http://python.org/download/releases/2.7.3/>

Python alert as reported here: <http://mail.python.org/pipermail/python-dev/2011-December/115116.html>

The security software that alerted me is Secunia's Personal Software Inspector which can be downloaded and used freely from here: [http://secunia.com/vulnerability\\_scanning/personal/](http://secunia.com/vulnerability_scanning/personal/)

Screen shot of the alert is provided in the attachment "QGIS Security Alert.png".

### History

#1 - 2012-06-30 12:52 PM - Jürgen Fischer

- Resolution set to upstream

- Status changed from Open to Closed

upstream bug [OSGeo4W !#297](#) filed.
