Installed how?

#3 - 2012-07-03 01:15 AM - Nebojša Tanasković

Installed with OSGEO4W installer- advanced install.

start qgis-dev.bat, not qgis-dev(.exe).

#5 - 2012-07-03 01:47 AM - Nebojša Tanasković

that's what I'm doing all time.

Hm, ok. So how can I reproduce the problem?

Here the message appears when I type qgis-dev (which starts qgis-dev.exe), but not when typing qgis-dev.bat (or using the desktop or start menu shortcut).

#7 - 2012-07-03 03:31 AM - Nebojša Tanasković

I tried to start:

-via desktop shortcut

-via start menu

-via explorer

result is same- error message.

- Status changed from Reopened to Feedback

#9 - 2012-07-19 10:20 PM - Nebojša Tanasković

- File *qgis_1.9.0_error_2.jpg* added

with new version of Qgis 'Master' I have an similar error with message as in in attachment(also error with qgis_core.dll).

| *Jürgen Fischer :*

| *qgis-dev.bat , not qgis-dev(.exe)*

Thanks for the advice of using the bat launcher, it was very helpful to me.

PS By the way, qgis-dev(.exe) would just cause the following error message in French :

qgis-dev.exe – Erreur système

Impossible de démarrer le programme car il manque qgis_core.dll sur votre ordinateur. Essayez de réinstaller le programme pour corriger ce problème.

OK

(I am using QGIS 1.9.0-Master on Windows 7.)
