

QGIS Application - Feature request #5942

Composer attribute table column order

2012-07-04 10:15 AM - John Tull

Status:	Closed	Resolution: Copied to github as #: 15373
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
It would be nice to be able to place columns in a composer attribute table in custom order. The most intuitive approach would be a drag and move feature in the actual table, i.e., click a column and drag it to the position you want it to be placed on the composer table. As it stands, the columns must be ordered in the actual table outside of the composer.		

Associated revisions

Revision dc905acc - 2014-05-15 04:06 AM - Nyall Dawson

[FEATURE][composer] Rework attribute tables to make tables more flexible.

- Add support for reordering columns in a table (fix #5942)
- Add support for expression based columns
- Add support for setting column alignment (fix #2957)
- Add support for setting column header alignment
- Make sorting in tables correctly handle nulls, dates, times, locale aware string sorting

This work also paves the way for future expansion of attribute tables to allow for setting column widths, column colors, etc.
