QGIS Application - Bug report #6017
# Qgis builds broken histrogram if input src image contains <no-data> values

2012-07-11 08:52 AM - Nikos Ves

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Rasters			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	duplicate	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15402	

Description

I've calculated an enviromental index, and because of the input data many pixes of the final product contain many <no-data> values.
When I load the image to qgis, and tabing to histogram page, the resulting histogram is unsualble due the large amount of chaff. Picture
attached.
