

QGIS Application - Bug report #6085

Composer does not maintain state of render preview and page zoom

2012-07-23 01:03 PM - Tim Sutton

Status:	Closed	
Priority:	Normal	
Assignee:	Marco Hugentobler	
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:	Linux (Ubuntu)	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: up/downstream
Crashes QGIS or corrupts data:	No	Copied to github as #: 15439
Description		
<p>If I save a composer, close the project and then open it again, it forgets the settings for render preview - cache.</p> <p>It also forgets the page zoom level (maybe not so easy to maintain if the window has changed size).</p>

Revision cc9f2a62 - 2015-04-14 01:41 AM - Sandro Mani

Call QgsComposer::restoreComposerMapStates in QgsComposer:changeEvent,
not in showEvent (latter does not work reliably with some window
managers, such as openbox) (fix #6085)

Revision 2037c346 - 2015-07-09 04:14 AM - Nyal Dawson

Call QgsComposer::restoreComposerMapStates in QgsComposer:changeEvent,
not in showEvent (latter does not work reliably with some window
managers, such as openbox) (fix #6085)

History

#1 - 2012-07-24 08:21 AM - Marco Hugentobler

This is a problem on gnome, the composer does not receive a show event when visible (because to make project loading faster, the composermappings are created in rectangle preview mode and the maps are drawn when the composer is first opened). It works on KDE (and afaik also on windows).

#2 - 2014-02-05 08:16 PM - Nyal Dawson

- Resolution set to up/downstream
- Target version deleted (Version 2.0.0)
- Category changed from 33 to Map Composer/Printing

#3 - 2014-02-06 01:30 AM - Nyal Dawson
