

QGIS Application - Bug report #6116

QGIS WFS server doesn't work with uDIG and Arcgis as clients

2012-07-28 10:15 AM - Giovanni Manghi

Status: Closed	
Priority: High	
Assignee:	
Category: QGIS Server	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 15455

Description

After a few tests with WFS clients other than QGIS (gvSIG, uDIG and Arcgis 10/9.3) that the only working WFS client for QGIS WFS server is just QGIS.

Under gvSIG and uDIG it seems somehow to connect to the server but then the layer list is not presented and so it is not possible to go on. Under Arc I get an error message like

```

```

the same WFS server works fine under QGIS as client, so it seems to me a server problem rather than a client one.

fix #6116

History

#1 - 2012-07-28 10:15 AM - Giovanni Manghi

- Subject changed from QGIS WFS server works just with QGIS as WFS client to QGIS WFS server just works with QGIS as WFS client

#2 - 2012-08-01 04:31 AM - René-Luc ReLuc

- File 6112 added

Moving FeatureTypeList element to WFS_Capabilities

#3 - 2012-08-01 05:04 AM - Jürgen Fischer

- Subject changed from QGIS WFS server just works with QGIS as WFS client to QGIS WFS server only works with QGIS as WFS client

#4 - 2012-08-01 05:11 AM - Jürgen Fischer

- Status changed from Open to Closed

Fixed in changeset commit:"40c01ad1828def0b602766544a75b92a8661d050".

#5 - 2012-08-16 02:25 PM - Giovanni Manghi

- Status changed from Closed to Reopened

- Subject changed from QGIS WFS server only works with QGIS as WFS client to QGIS WFS server doesn't work with uDIG and Arcgis as clients

New description:

I tested the server again with the latest fix applied and it turns that with 2 of the 5 clients tested, uDIG and Arcgis, it doesn't work (the others are QGIS, gvSIG and GRASS).

To notice that the same layers when served with Mapserver (formerly UMN Mapserver) do works fine with all the clients.

uDIG fails to list the layer list, while Arcgis now does not show any error message, shows the layer list but also a "no geometry", and when added to the project no feature is retrieved.

I don't know if is a client or server issue, anyway with other servers all the tested clients work well.

To allow let QGIS server be considered a really working solution I guess that this issue must be sorted in a way or another.

#6 - 2012-08-25 02:10 PM - Giovanni Manghi

The DescribeFeature Request is different in Mapserver and QGIS server. The Mapserver service works fine also on Arcgis and uDig.

here is mapserver

http://mapserver.uevora.pt/cgi-bin/mapserv?map=/home/mapserver/mapfiles/ue_wfs.map&REQUEST=DescribeFeatureType&TYPENAME=evra&SERVICE=WFS&VERSION=1.0.0

here is qgis server

http://mapserver.uevora.pt/cgi-bin/qgis_mapserv.fcgi?map=/home/mapserver/mapfiles/ue_wfs.qgs&REQUEST=DescribeFeatureType&TYPENAME=evora&SERVICE=WFS&VERSION=1.0.0

serving the very same layer (a shapefile)

#7 - 2012-09-05 12:59 AM - René-Luc ReLuc

Giovanni the information about DescribeFeature has to be added to the new bug #6302

This one concerning GetCapabilities.

#8 - 2012-09-05 01:04 AM - René-Luc ReLuc

serving the very same layer (a shapefile)

There is no big differences between the twice DescribeFeature, just the gid type.

done

This one concerning GetCapabilities.

so I should close this ticket?

#10 - 2012-09-06 12:15 PM - René-Luc ReLuc

you can close this issue, we will continue in #6302

#11 - 2012-09-06 02:44 PM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Reopened to Closed
