QGIS Application - Bug report #6138
Cannot specify encoding for compressed Shapefiles

2012-08-01 04:06 AM - Anita Graser

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Browser		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15469

Description

Using new file browser panel, it is possible to load compressed Shapefiles. But I don't see a way to specify the attribute encoding. It always seems to default to UTF-8. This turns the feature pretty much useless in non-English-speaking regions.

History

#1 - 2014-06-28 07:42 AM - Jürgen Fischer

- Target version changed from Version 2.0.0 to Future Release - Lower Priority

#2 - 2015-10-10 01:08 AM - Anita Graser

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Since layer encoding can be changed in the layer properties, this is not an issue anymore.
