

QGIS Application - Bug report #6152

SLD export saves a schema invalid file

2012-08-04 08:15 AM - Andrea Aime

Status: Closed	
Priority: Normal	
Assignee: Giuseppe Sucameli	
Category: Symbology	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 15476

Description

The rules generated by QGIS contain schema invalid output, here is a sample:

```
<se:Rule>
  <se:Name>159.0550 - 137771.0580</se:Name>
  <se:Description>159.0550 - 137771.0580</se:Description>
  ...
</se:Rule>
```

The Description element is defined, in SE 1.1, as:

```
<xsd:complexType name="DescriptionType">
  <xsd:sequence>
    <xsd:element name="Title" type="xsd:string" minOccurs="0"/>
    <xsd:element name="Abstract" type="xsd:string" minOccurs="0"/>
  </xsd:sequence>
</xsd:complexType>
```

So the generated markup should actually look like the following:

```
<se:Rule>
  <se:Name>159.0550 - 137771.0580</se:Name>
  <se:Description>
    <se:Title>159.0550 - 137771.0580</se:Title>
  </se:Description>
  ...
</se:Rule>
```

please give a try to qgis master, there have been fixes ablut SLD support after the relase of qgis 1.8

#2 - 2012-08-04 08:31 AM - Andrea Aime

Btw, this is on Ubuntu 10.04, QGIS 1.8.0 - Lisboa, coming from the UbuntuGIS apt

there is a repo for Ubuntu that allows to install qgis-master, see the qgis download page.

I've just found the same behavior on the Windows release of QGIS 1.8.0 Lisboa, so it's not OS or package specific

can you try qgis-master under Windows? it is easy to install with osgeo4w.

#6 - 2012-08-04 09:15 AM - Andrea Aime

Ok, with QGis master things look better, the document is valid, but it will still won't work 100% good with SLD based systems:

```
<se:Rule>
  <se:Name>159.0550 - 137771.0580</se:Name>
  <se:Description>
    <se:Abstract>159.0550 - 137771.0580</se:Abstract>
  </se:Description>
  <ogc:Filter>
    <ogc:And>
      <ogc:PropertyIsGreaterThan>
        <ogc:PropertyName>LAND_KM</ogc:PropertyName>
        <ogc:Literal>159.055</ogc:Literal>
      </ogc:PropertyIsGreaterThan>
      <ogc:PropertyIsLessThanOrEqualTo>
```

```
<ogc:PropertyName>LAND_KM</ogc:PropertyName>
<ogc:Literal>137771</ogc:Literal>
</ogc:PropertyIsLessThanOrEqualTo>
</ogc:And>
</ogc:Filter>
<se:PolygonSymbolizer>
  <se:Fill>
    <se:SvgParameter name="fill">#f7fbff</se:SvgParameter>
  </se:Fill>
  <se:Stroke>
    <se:SvgParameter name="stroke">#000000</se:SvgParameter>
    <se:SvgParameter name="stroke-width">0.26</se:SvgParameter>
  </se:Stroke>
</se:PolygonSymbolizer>
</se:Rule>
```

The Description tag is now valid, but in order to support proper legend generations in GeoServer it should use Title, not Abstract (which is meant for a verbose description of the style, as opposed to the title, which is meant to be concise and usable in legends)

I agree, I'm changing it.
