<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15518
<b>Description</b>		
<p>Hello,</p> <p>QGIS 1.8 release is built with GDAL 1.9.1. This version of the library can handle lots of new file formats as you can read on <a href="#">the release page</a> . The main problem is that those file formats are not listed on the filters shown to the user who wants to open a new layer or raster. To open those files formats, you have to select the "All files" filter which is a behavior not so natural: users generally believe that they can open a file only if the format is listed in the open dialog filter list.</p> <p>I've tested the following file formats and they are working pretty well under QGIS:</p> <ul style="list-style-type: none"><li>- EDIGEO</li><li>- XLS</li></ul> <p>I believe this is a bug and not a feature because it seems that QGIS can open all of the new formats that OGR can open: it is only a user dialog problem.</p> <p>For the next release, if QGIS is built with the 2.0 version of GDAL, you could also add ODS (Open/LibreOffice file format for spreadsheet) in the filters.</p>		

History

- #1 - 2012-08-16 09:46 AM - Giovanni Manghi**
- Operating System deleted (All)
  - Subject changed from QGIS Open layer and raster dialogs should display all the filters for OGR/GDAL (well) managed files. to Update format list in the "Add raster layer" dialog
  - Target version changed from Version 1.8.0 to Version 2.0.0
- #2 - 2014-06-28 07:42 AM - Jürgen Fischer**
- Target version changed from Version 2.0.0 to Future Release - Lower Priority
- #3 - 2015-11-14 10:00 AM - Médéric RIBREUX**
- Resolution set to fixed/implemented
  - Status changed from Open to Closed
  - % Done changed from 0 to 100
  - Estimated time set to 2.00

Hello,

since commit:56de17e, I've got all the formats I wanted. Time to shut this bug done !
