

## QGIS Application - Bug report #6225

### list of layers in zip shown a second time if none selected

2012-08-19 05:38 PM - Alister Hood

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> Etienne Tourigny	
<b>Category:</b> Data Provider	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No

<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 15536
<b>Description</b>	
<p>QGIS has the ability since 1.8 to load layers from inside a zip. If the zip contains more than one layer then a list of the layers is shown for the user to choose which one to load. This is the same as when loading layers from a personal geodatabase which contains multiple layers, or when loading a folder of shapefiles.</p> <p>However, when loading layers from a zip the list of layers to choose is shown a second time if the user clicked "Cancel", or did not select any layers.</p> <p>When loading the other sources (i.e. not a zip) the list of layers is not shown a second time.</p> <p>I think the behaviour should be consistent.</p> <p>Tested with master on Windows and Linux.</p>

- Status changed from Open to Feedback

I'll look into this sometime this week. Does this happen with all formats, or just shapefiles?

**#2 - 2012-08-27 03:27 PM - Alister Hood**

All formats.
