Description

I tried to use a Distance Matrix with a postgis vector and I obtained a illeggible csv file. If I save the postgis vector as a shp file the Distance Matrix works well.

It still doesn't work for PostGIS layers, as the matrix is full of zeroes. Curios enough, re-saving the vector as shape does not seems to solve the issue, as the resulting matrix is still wrong.

There is no crash or data corruption, so I'm lowering the priority.
