Affected QGIS version:	master	**Regression?:**	No
Operating System:	Linux	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15565

Description

If on create a MSSQL connection not specify DSN and enter the server settings manually, the connection is not working. By default will be selected FreeTDS driver. But the driver does not work if the port is not specified! On connection ODBC throw exception.
If create DSN with explicit port specified, connection will be working.
So there is no way to specify the port to connect for Windows version of QGIS.
IMHO need additional field for connection from - Port, with default value 1433.

Revision c322cd52 - 2012-09-03 11:01 AM - Tamas Szekeres

Specify port 1433 for FreeTDS by default. Allow to specify server/database/uid/password when the driver setting is present (fixes #6259, fixes #6263)

Port setting is now specified by default
