

QGIS Application - Bug report #627

problem loading GRASS raster

2007-03-02 03:09 AM - lami-faunalia-it -

Status: Closed	
Priority: Low	
Assignee: Tim Sutton	
Category: GRASS	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10686
Description	
You can see the name of the GRASS raster by the Grass tool browser or by the icon "Load a GRASS raster layer" but you can't load any layers. No merror message from QGIS

Confirmed. It's serious bug because you cant also use any modules fro raster processing :-(. The problem appears also in 0.8.1-preview3

#2 - 2007-04-02 05:36 PM - Tim Sutton

- Status changed from Open to In Progress

I confirm. On Windows XP Home, the 0.8.1 prev3 r1 does not render GRASS rasters, eg. from the spearfish60 dataset r2. I can select a GRASS raster with "Add GRASS raster layer" tool, add it, then it loads for a while, but in the end it's not added to the layer list or displayed.

The black box which usually spawns and dissapears when other kind of layers are added, does not pop up in case of GRASS rasters.

Oops - missing links, FWTAW:

r1 http://qgis.org/uploadfiles/testbuilds/qgis_setup0.8.1preview3.exe

r2 http://grass.itc.it/sampled/spearfish_grass60data-0.3.zip

#5 - 2007-06-11 05:38 PM - Tim Sutton

- Status changed from In Progress to Closed

- Resolution set to fixed

This is fixed in my latest rc3 build.

Tim
