Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	15590	

Description

After installing qgis-dev via Osgeo4w-Installer, the qgis-dev.bat does not start the program. The following dlls are missing:

qwt5.dll

spatialindex1.dll

sqlite3.dll (older version in bin folder present, but will not work).

When I copy them manually from my standalone Installation of Qgis 1.8.0 (under C:\\Programs (x86)\\...), the program starts.

I don't know where the installer has put the dlls, or if he did at all.

qgis-dev.bat contains:

```
@echo off

SET OSGEO4W_ROOT=C:\\OSGeo4W
call "%OSGEO4W_ROOT%"\\bin\\o4w_env.bat
call "%OSGEO4W_ROOT%"\\apps\\grass\\grass-6.4.2\\etc\\env.bat
@echo off
path %PATH%;%OSGEO4W_ROOT%\\apps\\qgis-dev\\bin;%OSGEO4W_ROOT%\\apps\\grass\\grass-6.4.2\\lib
set QGIS_PREFIX_PATH=%OSGEO4W_ROOT:\\=/%/apps/qgis-dev
start "Quantum GIS" /B "%OSGEO4W_ROOT%"\\bin\\qgis-dev.exe %*
```
