Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10122

Description

Transfer of ticket 1311515 on sourceforge

QGIS v0.7 compiled on A64 [[SuSE]] 9.3)

I have created a project file with several scale dependent layers.

Map units are m.

When I reopen the project file, only a few layers are plotting, as the map units has reverted to degrees, which throws the scale out somewhat.

I can change map units back to m, after which it seems fine.

I assume that the issue is simple the map units rather than any other problem.

Thanks guys!!
