Description

Hi,

When drawing Pie Charts with Diagrams: section Position, placement Aroundpoint.

Diagrams are nicely drawn around the point. But Line Options is grayed. I can't see any lines between origianl point and "re-placed" Pie chart.

History

Here is screen snapshot: http://gis.stackexchange.com/questions/32591/how-to-draw-lines-for-diagrams

#2 - 2012-09-04 12:07 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#3 - 2012-09-05 05:28 AM - Matthias Kuhn

- Status changed from Open to Closed

The line option is only available for layers containing line features.

In the current master, the option is disabled for any other layer so it's no more misleading.

If you think that there should be an option to connect points to charts, please file a feature request.
