Category:	GUI			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10690	

Description

We have imported a raster file created from Google image tiles. When attempting to use the line measurement tool we noted that when we measure 1000 meters the measurement tool displays some 100+Km. There should be some way to calibrate the measurement tool

History

- Resolution set to duplicate

- Status changed from Open to Closed

This is/should be fixed in trunk (version 0.9) No backport planned at the moment.

See bugs #535 (with workaround), #518 and #449.
