

QGIS Application - Bug report #632

various problems using WMS with QGIS

2007-03-02 05:02 AM - Redmine Admin

Status: Closed	
Priority: Low	
Assignee: Magnus Homann	
Category: Web Services clients/WMS	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10691
Description	
<p>Hi list,</p> <p>I'm having a few problems with my WMS service using QGIS as client. May be anyone has a few hints or ideas:</p> <p>Using QGIS 0.8.0 on opensuse:</p> <ul style="list-style-type: none">- a polygon layer doesn't show with transparency - even though it is implemented in the WMS and it works with other clients, the transparency as well is not adjustable using the properties menu (well i can change it to 50% but it doesn't change the view) - the transparency works very nice, if I use the WMS-feeding postgis-service directly. [projection on runtime is activated] <p>Using QGIS 0.8.1 preview2 (pretty fresh installation with complete uninstall of 0.8.1p1) on [[WinXP]]:</p> <ul style="list-style-type: none">- while zooming in a WMS-raster or vektor layer an error message appears: msWMSLoadGetMapParams(): WMS server error. Image size out of range, WIDTH and HEIGHT must be between 1 and 2048 pixels. <p>This is probably due to a bug in the QGIS program. Please report this error.</p> <p>Tried URL: http://www.geographie.uni-freiburg.de/cgi-bin/chennai_wms?SERVICE=WMS&#38;VERSION=1.1.0&#38;REQUEST=GetMap&#38;BBX=80.417860,12.675728,80.602583,12.866004&#38;SRS=EPSG:4326&#38;WIDTH=3962&#38;HEIGHT=3962&#38;LAYERS=1.0.1%20Results%20Group%20Discussions&#38;STYLES=&#38;FORMAT=image/png&#38;TRANSPARENT=TRUE</p> <ul style="list-style-type: none">- get [[FeatureInfo]] doesn't return any results using the WMS (works, if I use the WMS-feeding postgis-service directly)- projection on runtime is activated, but layers show up at different places while loading the same layer via WMS and the WMS-feeding postgis-service (the wms layer is displaced, it works using QGIS 0.8.0 on opensuse) <p>Any ideas, hints, solutions, explanations?</p> <p>Marco</p>	

History

#1 - 2007-03-03 02:15 AM - Magnus Homann

- Status changed from Open to In Progress

So, there are three issues:

- 1) Transparency doesn't seem to work.
- 2) Zooming doesn't work
- 3) Get featurinfo does not work.

Am I right in this?

Can you split this bug in three parts, perhaps? It's easier to keep track on what is fixed and what is not. We work in small increments. :-)

#2 - 2007-03-03 02:39 PM - anonymous -

I have (tried to) fix issue 2 (maybe wrong placement too?) in . Please download source, compile and see if it gets better. Many thanks for your help.

If you have svn, you can check out with

svn co https://svn.qgis.org/repos/qgis/tags/Release-0_8_0 qgis_08

and build with cmake.

#3 - 2007-03-03 02:44 PM - Magnus Homann

Above comment was me, and the **correct** svn path is

svn co https://svn.qgis.org/repos/qgis/branches/Release-0_8_0 qgis_08

'branches' not 'tags'

#4 - 2007-03-05 01:13 PM - Magnus Homann

Regarding 1), transparency is not supported for WMS at the moment

#5 - 2007-03-18 02:13 AM - Magnus Homann

Uninstall old versionj and install this and try. Most problems should be fixed.

http://www.qgis.org/uploadfiles/testbuilds/qgis_setup0.8.1preview3.exe

#6 - 2007-12-09 08:52 AM - Magnus Homann

- Status changed from In Progress to Closed

- Resolution set to fixed

Please let me know if there are any unsolved issues.

#7 - 2009-08-22 12:54 AM - Anonymous

Milestone Version 0.9.2 deleted
