

QGIS Application - Bug report #6338

qgis server doesn't work with custom CRS

2012-09-13 09:35 AM - Andrea Pacifici

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	1.8.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 15619
Description		
<p>Hi,</p> <p>Qgis Server don't work with custom CRS. I'm trying to visualize a project I realized with custom CRS but Qgis say "Request contains a CRS not offered by the server for one or more of the Layers in the request. The WMS vendor also reported: Could not create output CRS". It is possible to eliminate this bug? Just to know, I realised some mapserver-p.mapper project using such custom CRSs, and they work very well.</p> <p>I'm using qgis 1.8 on ubuntu.</p> <p>Thanks</p>
