Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	15630

Description

Using the raster calculator in order to clip a raster users have to insert the layer extent manually (if another raster doesn't exist) and to calculate manually the numeber of columns and row.

Two useful improvment may be:
add a "set extention dinamically" funcion;
add the possibility to set cell size dimension instead of number of row and columns.
