| **Crashes QGIS or corrupts data:** | | **Copied to github as #:** | 10696 |

### Description

- I've built qgis_unstable from source
- I "add default services" for WMS
- Selected server connection "DM Solutions GMAP" and press "connect"
- Message pops up saying:
    Could not understand the response.  The wms provider said:
    WMS Server responded unexpectedly with HTTP Status Code 502 (Proxy Error)
    Tried URL: http://www2.dmsolutions.ca/cgi-bin/mswms_gmap?SERVICE=WMS&#38;REQUEST=GetCapabilities
- I press "close" then QGIS crashes

Let me know if there are more tests I can do.  Same action with Lizardtech connection.  JPL ones seem to work fine.

Dump report from apple tool is attached.

Tyler

### History

**#1 - 2007-03-05 12:05 AM - Magnus Homann**

Did you specify a proxy host?

**#2 - 2007-03-05 08:15 AM - spatialguru-shaw-ca -**

No, I left proxy host empty as I do not use one.  It is the same as the other entries that work.

**#3 - 2007-03-05 11:25 AM - anonymous -**

*- Resolution set to fixed*

*- Status changed from Open to Closed*

Confirmed, homann's fix https://svn.qgis.org/trac/changeset/6768 worked for me.  Thanks.
