QGIS Application - Bug report #6383
Map overview broken

2012-09-20 10:36 PM - Paolo Cavallini

Status:	Closed		
Priority:	Severe/Regression		
Assignee:			
Category:	GUI		
Affected QGIS version:	1.8.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	15642

Description

Map overview seems broken (tested on 15 machines, various OSs, about half not working). I suspect this has been opened already, but cannot find it.

History

#1 - 2012-09-21 10:16 PM - Mathieu Pellerin - nIRV

For a couple of weeks now, click on the [ ] show in overview right-click menu item fails to update overview with the specified layer unless you deactivate and reactivate the layer. Is this what you're referring to?

#2 - 2012-09-21 11:09 PM - Paolo Cavallini

- Affected QGIS version changed from master to 1.8.0

Not really: just adding a map to an overview fails to show any map in about half of the cases

- Status changed from Open to Feedback

is the overview map fixed? it works here on master!

#4 - 2013-06-01 08:36 PM - Nyall Dawson

I've noticed one issue with the overview map in Master - if a map item is set to 'rectangle' mode then overview frames are not shown when the composer is exported. Could this explain what you were experiencing Paolo?

I don't think the issue is this. Paolo is referring to the overview is available in the QGIS main window (right click a layer -> add to overview).

Exactly. It seems to work on current master in Debian though. Must be checked on Win.

#7 - 2013-06-06 07:57 AM - Regis Haubourg

Hi, not reproduced in osgeo4w master 5e29777..

#8 - 2013-06-06 09:01 AM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Feedback to Closed
